

19 + 20 Nov 2026
Super Bock Arena / Palacio de Cristal

Two communities
One landmark event

KCD Porto's Strategic positioning

We're not just present at the event.

We created and lead Iberia's most relevant Cloud Native + DevOps event.

Turning community into credibility, and credibility into business impact.

We created It

Main organizer and driving force

We run it

Curators of content, speakers, attendees and experience.

We shape it

Built by us with the community and for the community

How we built Iberia's most relevant Cloud Native + DevOps event

A deliberate 6-year bet on expertise, community, and content.

01 Positioning Problem

It started with a strategic challenge.

We were primarily positioned around engineering capacity.

But **Clients** were no longer looking for hiring capacity alone. They were **looking for real technical expertise, especially in Cloud Native enablement.**

👉 The question became:

How do we reposition from a "just a software house" to a recognized technical authority?

02 The Need For Community

The first move

As demand increased, so did the need to scale. We understood something fundamental:

You don't build authority in tech without a community. And you don't attract top leads without being visible in that community.

03 Build Through Content

We made a clear strategic bet.

Content-driven technical events 👉

This was credibility in action.

- Meetups (Cloud Native Lisboa / Porto)
- Deep engineering-led talks

How we built Iberia's most relevant Cloud Native + DevOps event

04 Building Credibility

The first move

We needed external validation.
We got certified by the
Cloud Native Computing
Foundation (CNCF)

👉 Result:
We started winning projects
with large enterprises.

05 CNCF Trust

The breakthrough

Consistency led to trust

CNCF validated our content and trusted us to organize
Kubernetes Community Days (KCD) in Portugal

👉 A global event. An internationally recognized format. A
strong signal: we were now a credible actor in the ecosystem

06 From Zero to #1 in Iberia

In just 2 years

In 2024, we started from scratch.
No legacy. No existing audience.

Just three things:

- Community
- Expertise
- Flawless execution

In 2025, KCD Porto had
become Iberia's largest
Cloud Native event

The numbers speak for
themselves 🙌

professionals in 2 days

30+

Ecosystem Control

Meetups organised year-
round amplifying synvert
xgeeks brand

The Business Impact & Position

A controlled environment for business outcomes

Strategic Framing	Outcome
Market Positioning Establish synvert xgeeks as the leading Cloud Native authority in Iberia	Category ownership at national level: a competitive position no one else holds.
Control Advantage We own the event, the audience, and the entire experience	We create and control visibility instead of competing for it. High-quality visibility: right audience, high impact
Lead Generation 20–30 qualified leads + curated interactions in a high-trust environment	Efficient pipeline generation with pre-qualified decision-makers already in the room. Curated Intros before, during and after the event with warm introductions facilitated as the organizers.
Talent Attraction 500+ engineers, architects, and CTOs in the same space for two days	Positions synvert xgeeks as employer of choice in Cloud Native. No recruiting spend needed.
Differentiation CNCf-backed event, built through community	Credibility that competitors simply cannot replicate. It took 6 years to build this.
Cost vs. Return Event is largely self-funded via sponsors and tickets. Carry-over buffer in place.	Low financial risk. High strategic upside. Each edition compounds the asset.

synvert xgeeks & CNCF

A strategic partnership that underpins everything we do in cloud

CNCF Silver Member

synvert xgeeks holds CNCF Silver Membership - one of the few Portuguese companies with this status.

This is not just a badge. It is an investment in the ecosystem and a commitment that unlocks influence, visibility, and trust in the global cloud native community.

98% of organisations have adopted cloud native techniques. 82% run Kubernetes in production. Being embedded in CNCF means we are at the center of where the industry is heading.

Community Leadership & Recognition

We organise the only two official CNCF meetups in Portugal:

Cloud Native Lisbon | Cloud Native Porto

- CNCF is becoming increasingly selective in choosing KCD host cities;
- Portugal was chosen again based on our track record, community feedback, and execution quality
- We organize the **only KCD in Portugal and the Iberian Peninsula**

KCD Porto - Track Record

Three years running - consistent growth, self-funded, built and managed by synvert xgeeks

KCD Porto 2026 x DevOps Days Portugal

Two global communities. One historic merger. synvert xgeeks as legal entity for both.

What is DevOps Days?

A global conference series founded in 2009 in Ghent - covering software development. 200+ editions across 40+ countries. A reference in the DevOps world.

DevOps Days Portugal already ran events in Porto before KCD Porto. They approached us to join forces, recognising the scale and quality we have built.

Why this matters for synvert xgeeks

synvert xgeeks is now the legal entity behind two of the most recognised tech conference brands in Portugal with international reach. That is not just brand visibility.. it is institutional weight.

Only KCD in Iberia | CNCF Tier 2 | Highest possible category (max 500 pax) | CNCF selects who can organise | competition is fierce and we were chosen again

Date

19 + 20 November 2026

Venue

Super Bock Arena / Palacio de Cristal, Porto

Attendees

500+ estimated | 150+ companies

Content

50+ speakers | 4+ keynotes | multiple tracks

The Venue

Super Bock Arena / Palacio de Cristal, Porto

Main Auditorium

500+ capacity - openings, keynotes, sessions

4 Breakout Rooms

50–100 people each - parallel sessions

Sponsor Foyer

Mandatory passage area - maximum booth visibility

Garden / Networking

Networking lunches, cocktails, Porto de Honra in the Crystal Palace gardens

Community Power & Industry Recognition

synvert xgeeks is the central organising force behind Portugal's cloud native and DevOps community

Our Community Ecosystem

- Cloud Native Porto + Cloud Native Lisbon
- DevOps Porto + DevOps Lisbon + DevOps Braga
- AWS User Groups: Porto, Braga, Lisbon, Castelo Branco
- Lisbon GenAI Community and LeadDev Lisbon

30+ community partners

national tech communities amplifying KCD across their own audiences - bringing in attendees, speakers and visibility that money cannot buy.

This year-round presence in every major city is precisely what makes KCD Porto so well-known and well-attended.

synvert xgeeks is the legal entity. May need to front initial costs - returns come through sponsor fees and ticket sales. EUR 10k carry-over buffer from 2025 already in place. Prominent positioning is guaranteed.

KCD Porto - Future Editions

Long-term vision | Let's Brainstorm!!

01 Continue at Tier 2 in Porto

This is the maximum CNCF allows for a KCD - designed not to compete with KubeCon. We continue at this level, innovating within it: stronger international keynotes, thought leadership tracks, community track, more gamification.

02 International Keynotes

Attract even more global names from the CNCF and others ecosystem as keynotes. Elevate KCD Porto from a national event to a European reference for cloud native practitioners.

03 Thought Leadership Track

A dedicated track for CTOs, VPs of Engineering and decision-makers. Closer alignment with business strategy, not just technical depth.

04 Community Track & Gamification

Community tracks and deeper community engagement and retention across the year.

05 Annual Anchor Event

Solidify KCD Porto as the go-to annual Cloud + DevOps event in Portugal. The place where the industry gathers, year after year.

Beyond KCD: Cloud Native Days Europe?

KCD and CNCF brands have limits. But synvert xgeeks could create a Cloud Native Day Europe - or partner with existing KCDs across Europe - to build a European-scale event with synvert xgeeks at the center.
